STANDARD LIFTERS

MAKING INNOVATION THE STANDARD

Stamper Discount Program

Why:

To provide stampers with a 50% discount on all replacement components and a 5% discount for Die Shops building new tooling.

Stamper (replacement components)	Die Shop (new build)
50% off	5% off

How:

Step 1:

The stamper fills out the Stamper Discount Form and provides it to Standard Lifters to place on file.

Step 2:

Standard Lifters will then contact the list of Die Shops notifying them of the new build discount they are now eligible for. Standard Lifters will then provide the Die Shops with catalogs, product samples, or any other assistance they need.

Step 3:

Anytime an order is placed by the Stamper or Die Shops, the related discount will be applied.

- Die Shops need to provide the related Stamper info when placing each order
- Stampers will need to provide (when possible) the product serial # or Job/Detail # of the product they are replacing when placing an order.
- Discount is also applied to components ordered for Tool Room inventory to be used as replacement parts for dies in production. (not new build)
- Stampers that also do new build will receive the 5% discount on the new build components.

After receiving the completed form ... we will also send a free Replacement Parts Kit to each of your stamping facilities ...
