

GK - Gages and Tools

Contact SL for information on the below items that will make using the Guided Keeper easier

GK Base Machining Bore Gages

SL highly recommends using gages when performing the machining required to mount our bore located GK Bases. The gages will help to ensure a good fit for the base, not too tight and not too loose. Your CNC department will appreciate these!

GK Guide Pin Machining Bore Gages

SL highly recommends using gages when performing the machining required to pocket mount our Guide Pins. The gages will help to ensure a good fit for the Pin, not too tight and not too loose. Your CNC department will appreciate these!
