

# Innovative Design

Other Pilots have a simple cone shape resulting in reduced strength in this area

## The "Ideal" Taper

The "lift transition" taper is 3 degrees which prevents the stock from binding without trading off pilot robustness

## Small Footprint

Fits in tight spaces

## No Mounting Insert Required

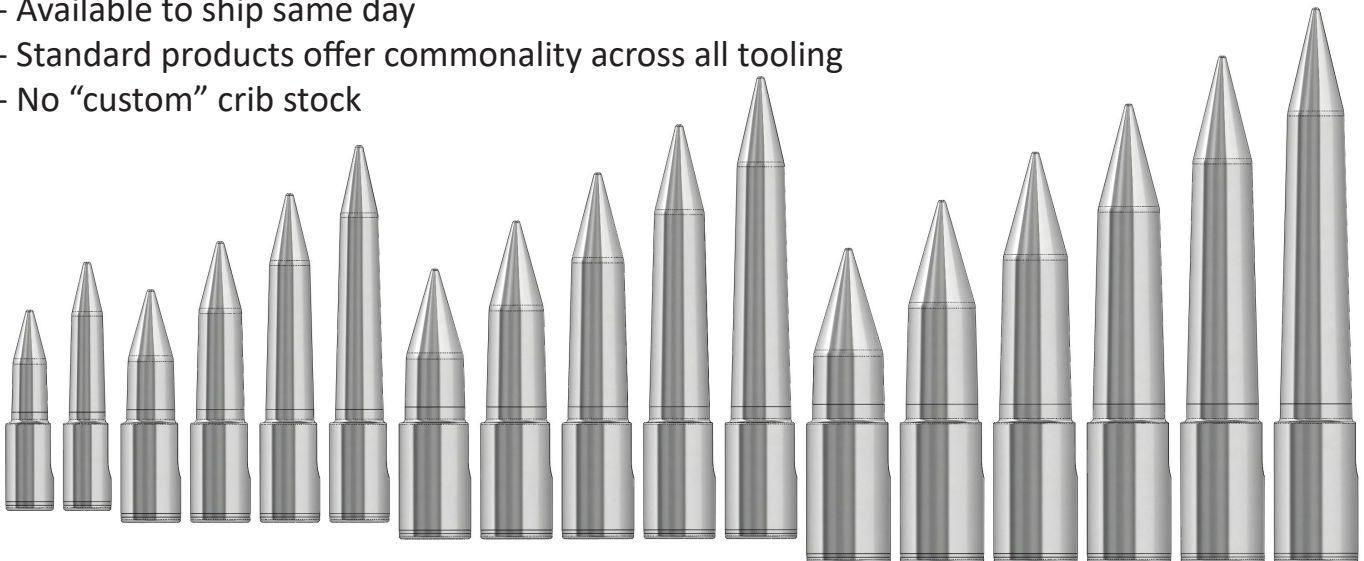

Reduces cost and hassle

## Heavy Duty - One Piece Design

Pilots are hard M2 (60 HRC)

# Standard Sizes & In Stock

- Available to ship same day
- Standard products offer commonality across all tooling
- No "custom" crib stock

10mm / .375" Diameter  
13mm / .5" Lift

68 Standard Product Options

20mm / .75" Diameter  
75mm / 3.0" Lift
